Why Buy an Aqua-Gem Boiler?

DS Machine is a family owned business packed with 30 years experience in designing and engineering boilers.

Our boilers:

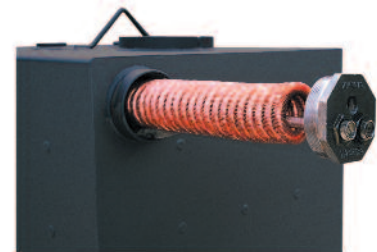

- have water circulating in the front of the boiler to prevent cracking
- are designed with the best cast iron grate system built to last
- are pressure tested to 120 PSI
- have a great heat exchanger to maximize efficiency
- can be an add-on to an existing hot water system
- have a domestic water option
- are constructed with 1/4" steel
- have a large capacity ash pan
- easily maintain water temperature

DS3200 without sheet metal sides

Rear view of boiler

Copper coil

Features:

- Burns wood and coal
- Safety tested to UL standards
- Heavy duty cast iron grate system with external shaker handle
- Large 9" cast iron ash door
- Secondary air to burn gases
- 1/2" NPT fitting for temperature pressure gauge
- 3/4" NPT fitting for ASME pressure relief valve
- 3/4" NPT fitting for Aquastat
- 3/4" fitting for Samson draft regulator
- Optional 4-gallon per minute domestic water coil
- Optional forced draft
- Optional insulation / sheetmetal cabinet
