

Harmony I Non-Catalytic Stove

Crafted by Belgian Artisans

- Superior efficiency
- Rugged cast iron body
- Large glass window stays clean
- Classically inspired styling
- Heats up to 1,500 sq ft
- Smart, affordable investment

A Lifetime of Comforting, Efficient Heat.

Harmony I Non-Catalytic Stove

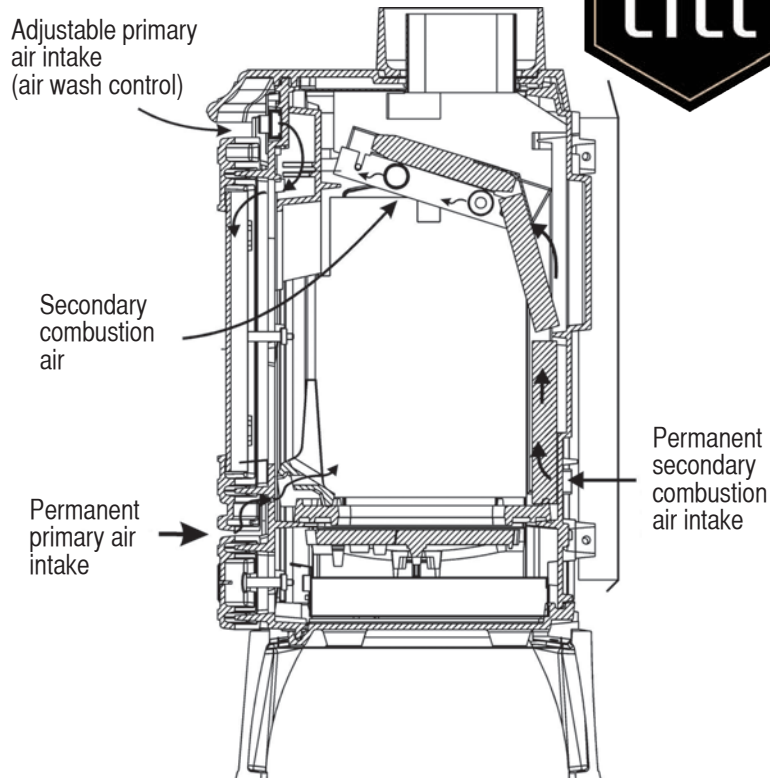

Classic styling and advanced non-catalytic technology make the Harmony a comforting, efficient addition to your home. The cast iron body provides superior heat retention to get the most heat from the wood you burn. Enjoy a generous view of the flames through the wide, glass-paneled door. Airwash system burns off creosote to keep the glass crystal clean. The Harmony I effectively heats a small home or cabin, or a large living area.

Features and Benefits

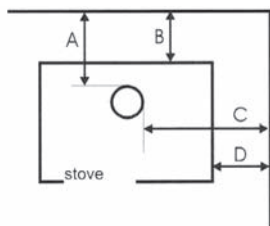

- Up to 77% Efficient
- Durable cast iron body
- Side and front loading doors
- Top venting
