

SOAPSTONE

Creating Warmth... Inspiring Comfort.

There is a decided difference between a house and a home. It's about creating a warm welcome that goes well beyond heating – an ambiance that reflects your personal style and beckons with its genial embrace. This concept is at the heart of every Hearthstone®. Designed with the beauty of a fine piece of furniture, a Hearthstone Stove combines reliability with time-tested craftsmanship to become an essential part of your unique home experience.

Soapstone: The Signature of Luxury

There is nothing quite like soapstone. Extraordinarily beautiful and possessing remarkable stability, soapstone is the ideal stove component. Hearthstone harnesses this magic to create our finest family of stoves: the Select Collection. Crafted with hand-selected soapstone, these stoves are brilliant for their functionality as well as their design, and are testament to Hearthstone's proud heritage of fine stove-making.

The superior quality of these stoves starts with the material itself. Storing more heat for its weight than any other naturally occurring material, soapstone panels absorb the high heat of the fire to emanate natural, even warmth long after the fire dissipates. Soapstone is what gives Hearthstone Select stoves superior HeatLife™ – and what has made the Hearthstone brand the most popular soapstone stove on the market.

SUPERIOR PERFORMANCE OF SOAPSTONE

Your Stove, Your Style

The soapstone panels incorporated in the Select series are all hand-chosen and hand-matched to create a coordinated and highly individual pattern of understated elegance. From distinct grains to subtle nuances of color, within each stove a thoughtful design is matched with this careful complement of materials to guarantee each Hearthstone soapstone stove bears its own unique signature, and holds the qualities you would expect of a favorite heirloom.

The result is a stove that is remarkably efficient, functional, durable, and beautiful, and showcases the warmth of your personal character in your home. 🔥

Hearthstone Products are made in Vermont by people who take great pride in their work. There's no assembly line – just a keen understanding of the need for efficiency and functionality. As well as the desire for stunning presentations that can serve as the centerpiece of a room.

What's in a Name? Everything.

The Hearthstone brand is an assurance – a guarantee that your appliance is built in the rich tradition of our company, and will serve you faithfully for years to come.

Your Hearthstone purchase represents not only the latest in aesthetic advances, but also the utmost in powerful heating technology. It's this integrity that gives Hearthstone Stoves their unmatched appeal, and has for over 35 years.

There's a Hearthstone that's Perfect for You...

Carbon-neutral wood-burning or ultra-efficient gas-fired. Classically styled or contemporary. For heating your entire home or just warming a single room. With so many choices – and so many finishes – the joy of Hearthstone is that there's bound to be one that's perfect for you. We invite you to get acquainted with our vast collection of freestanding stoves and inserts, starting on these pages. From rustic to elegant, casual to formal, Hearthstone is an ideal way to bring home a special warmth – to create the heart of your home.

Live Green

Did you know that a tree decomposing in the forest emits the same amount of carbon dioxide into the air as burning that same tree in an efficiently burning Hearthstone woodstove?

At Hearthstone, our business is filling family homes with warmth – not just today, but for future generations as well. Whether fueled by wood or gas, our family of products offers viable alternative heat sources that are highly environmentally conscious. Our woodstoves utilize modern, low-emission combustion technology to create carbon-neutral burning – a factor that is a top priority for us. Similarly, our gas stoves bring the benefits of efficient zone heating, and accordingly help reduce CO₂ emissions.

We're working hard to preserve nature by providing heating solutions that can help lessen the greenhouse effect. And we will continue to make climate protection – both today and tomorrow – a vital and important goal.

Our Hergōm foundry is committed to innovative programs and new initiatives that mitigate our impact on the environment. These environmental efforts are aimed to meet the European IPPC (Integrated Pollution Prevention and Control) standards.

EnerGuide is a Government of Canada rating system that provides consumers with comparative information on the energy performance of energy-using products sold in Canada. For more information on the EnerGuide Program, please go to the EnerGuide Web site at: www.oee.nrcan.gc.ca/equipment/

Warranty: Hearthstone warrants all its wood and gas stoves and inserts to the original purchaser for the lifetime of the appliance to be free from defects in material and workmanship, with certain limitations as defined in our Limited Lifetime Warranty policy.

See your Hearthstone dealer for complete details and a copy of our warranty policy.

Wood Stove Features & Benefits

EQUINOX	MANSFIELD	PHOENIX	HERITAGE	CASTLETON	TRIBUTE
					
4.0-cubic-foot firebox – Accepts 25” logs through the front door or through the easy side-loading door. Front and side doors provide maximum loading ease and increased fuel efficiency. 8” reversible flue collar – Flexible installation; stove can be installed as a freestanding unit or as a hearth stove. Screen (optional) – Allows for open-door fire viewing. Side-loading door – Available on the left or right side. Side-door lock kit (optional) – Use optional lock kit to reduce side hearth clearance from 16” to 3 1/8”.	3.2-cubic-foot firebox; extra-wide door – Holds up to 64 lbs. of wood. The Mansfield’s deep firebox allows logs up to 19” in length to be accommodated straight in or 21” in length side-to-side for easy loading. Ember Protection Only–Hearth Requirement	2.2-cubic-foot firebox; extra-wide door – Holds up to 44 lbs. of wood; 21” maximum log length. 45-degree flue collar – Flexible installation; stove can be used as a freestanding unit or as a hearth stove.	2.3-cubic-foot firebox; side-loading door – Holds up to 46 lbs. of wood. The Heritage has a deep firebox and side-loading door that allow logs up to 21” in length to be accommodated side-to-side for easy loading, or use optional lock kit to reduce side hearth clearance from 16” to 5” measured from the body of the stove. Reversible flue – For top or rear exit. Ember Protection Only–Hearth Requirement	1.9 cu ft Firebox – Holds up to 38 lbs of wood. The Castleton has a generous firebox and accepts up to 18 in logs side to side and 15 in logs front to back Screen (optional) – Allows for open-door fire viewing. Reversible flue – For top or rear exit. Ember Protection Only–Hearth Requirement	1.2-cubic-foot firebox – Holds up to 20 lbs. of wood. The Tribute’s easy-load, front-loading door allows logs up to 16” in length. Screen (optional) – Allows for open-door fire viewing.
Open-and-close ash grate and removable ash drawer – Easy, clean ash removal; pan can be removed while fire is still burning.					
Fan with built-in thermostat and rheostat (optional) – Fan increases convective heat output with rheostat control. Use of rear heat shield is required.		N/A		Fan with built-in thermostat and rheostat (optional) – Fan increases convective heat output with rheostat control. Use of rear heat shield is required.	
Single air-intake lever/stove control – Stove operation is easy; performance more consistent. Non-catalytic combustion system – Clean-burning, complete combustion provides more heat from less wood, greater efficiency, reduced smoke and creosote buildup. Unmatched fire viewing – Air entering the firebox through the stove’s secondary air tubes ignites the gases rising off the burning wood. The resulting light and flames provide dazzling fire viewing, even when the fire is burning at a low rate. Outside air adapter (optional) – Improved efficiency in today’s newer, “airtight” homes; reduces cold air drafts along the floor. Rear heat shield (optional) – Allows more placement options; stove can be installed closer to a wall because clearance requirements are reduced; creates a convection passageway between shield and back of stove to allow optional fan to circulate air through house. Required when installing optional fan. Fan not available for Homestead hearth-mount installation.					

Note: Always refer to the Hearthstone Owner's Manual and the local authority having jurisdiction in your area for the specific installation requirements for your stove.

Wood Inserts & Outsert

Gas Stove Features

HOMESTEAD

2.0-cubic-foot firebox; extra-wide door – Holds up to 44 lbs. of wood; 21" maximum log length.

Ash pan – for easy ash removal.

Universal flue exit – Reversible, 45-degree flue collar allows top or rear stovepipe connection for a freestanding or hearth-mount installation.

Surround for hearth-mount (optional) – Reduces mantle and side clearance; enhances appearance and increases efficiency when Homestead is installed in an existing fireplace. Panel size 43 1/2" wide by 32" high.

Fan with built-in thermostat and rheostat (optional) – Fan increases convective heat output with rheostat control. Use of rear heat shield is required.

Single air-intake lever/stove control – Stove operation is easy; performance more consistent.

Non-catalytic combustion system – Clean-burning, complete combustion provides more heat from less wood, greater efficiency, reduced smoke and creosote buildup.

Unmatched fire viewing – Air entering the firebox through the stove's secondary air tubes ignites the gases rising off the burning wood. The resulting light and flames provide dazzling fire viewing, even when the fire is burning at a low rate.

Outside air adapter (optional) – Improved efficiency in today's newer, "airtight" homes; reduces cold air drafts along the floor.

Rear heat shield (optional) – Allows more placement options; stove can be installed closer to a wall because clearance requirements are reduced; creates a convection passageway between shield and back of stove to allow optional fan to circulate air through house.

Rear heat shield – Required when installing optional fan. Fan not available for hearth-mount installation.

CLYDESDALE

2.4-cubic-foot firebox – Large front door allows large viewing area and logs up to 22" in length to load easily.

Solid cast-iron door system

Cast-iron roller-latch – smooth operation and an airtight door.

Full-heat shroud around cast-iron firebox – increases convective heat output.

Surround extension (optional) – 36" H x 59" W (black anodized aluminum).

MORGAN

1.7-cubic-foot firebox – Holds up to 34 lbs. of wood and logs up to 18" in length.

Steel door system

Steel door latch

Surround extension (optional) – 35" H x 54 1/4" W (black anodized aluminum).

Soapstone-lined firebox – Extends HeatLife™.

Front/aft 2-position flue collar & depth-adjusting surrounds – Installation flexibility; unit will fit in more fireplaces.

Leveling legs – Adjustable after installation.

Fan with thermostat and variable-speed control – Factory-installed.

Screen (optional) – Allows for open-door fire viewing.

Surround base caps – Optional cast-iron base caps add beauty to the installation and can be used as a filler for raised insert installations.

Mantle shield (optional) – Reduces mantle clearances.

Reversible front-loading door –

Front door easily converts to open from either the left or right side to meet your specific installation needs.

Unmatched fire viewing –

The large glass front door allows an unobstructed view of the full firebox. Primary and secondary air combine for dazzling fire viewing on high or low settings.

Removable baffle –

Allows flue cleaning without removing the insert. Eases installation by connecting the flue liner within the firebox.

Single air-intake lever/stove control –

Responsive control; insert operation is easy, performance more consistent.

Non-catalytic combustion system –

EPA-certified, clean-burning, complete combustion provides more heat from less wood, greater efficiency, and reduced smoke and creosote buildup.

STERLING

Unique Direct-Vent installation – Easily installed next to an outside wall with no vertical pipe required. The Sterling can be installed 2" from an outside wall directly to a termination. (See manual for compact listing.) Most other venting options also available.

Millivolt ignition system – Stove can operate without electricity; excellent source of heat during power outages.

Three-way on/off/thermostat switch – Allows you to flip the stove on for instantaneous fire, or to control the stove from the wall thermostat, or to turn it off.

Wall thermostat – Thermostat turns unit on and off, and maintains the home at preset comfort level. Desired heat is maintained automatically. Optional programmable thermostat is also available.

Remote controls (optional) – Options include, variable-speed fan, on/off remote, thermostatic remote

Certified room heater with double heat exchange system – Increased stove efficiency; less heat lost up the chimney means more usable heat for less money.

Sealed firebox/Direct-Vent technology – Air for combustion is drawn from outside the home, reducing cold air drafts; greater efficiency due to not using heated room air for combustion.

Adjustable heat output – All the pleasure of fire-viewing ambiance, even when little room heat is required.

TUCSON DX

ProFlame I

HeatWave Refractory –

Improved radiant heat output.

ProFlame electronic ignition system –

Pilot is off when the stove is off, saving fuel and money. Comes with battery backup, so you can use the stove even without electricity.

Toggle switch – Continuous or intermittent pilot.

45-degree flue exit – Installation flexibility.

Three-way on/off remote switch

Window Screen included

Field convertible –

Stove ships ready for Natural Gas, Liquid Propane conversion kit available

Remote control –

Features thermostat, "smart thermostat," 5-level flame control, 5-speed fan control, child lock-out and auxiliary outlet.

5-speed circulating blower

& Benefits

Gas Inserts

Pellet Stove

TRIBUTE DV

Stone rear panels (optional) – Allows for placement in the center of a room with a beautiful, decorator finish from all angles.

Window screen (optional) – Enhances flame aesthetics. The firebox glass “disappears” from viewing, leaving only the dancing flames and glowing logs.

Variable-speed fan with thermostat (optional) – Thermostat monitors stove body temperatures and automatically controls fan.

MAIDSTONE / WILLOUGHBY / KILLINGTON

Large or small surrounds – Available in two surround sizes to fit your fireplace.

“One touch” piezo ignition – Battery-operated ignition system for easy lighting.

Window screen (optional) – Enhances flame aesthetics. The firebox glass “disappears” from viewing, leaving only the dancing flames and glowing logs.

Universal threshold (optional) – Raises the insert 1 ½” as a decorative option or to help fill fireplace opening.

Variable-speed fan with thermostat (standard) – Thermostat monitors stove body temperatures and automatically controls fan.

Wall thermostat – Thermostat turns unit on and off, and maintains the home at preset comfort level. Desired heat is maintained automatically. Optional programmable thermostat is also available.

Three-way on/off/thermostat switch – Allows you to flip the stove on for instantaneous fire, or to control the stove from the wall thermostat, or to turn it off.

Millivolt ignition system – Stove can operate without electricity; excellent source of heat during power outages.

Remote controls (optional) – Simple “on/off” and thermostatic remote controls allow the fire to be controlled from across the room. Temperature is controlled by the thermostat located within the remote itself.

Certified room heater with double heat exchange system – Increased stove efficiency; less heat lost up the chimney means more usable heat for less money.

Adjustable heat output – All the pleasure of fire-viewing ambiance, even when little room heat is required.

Sealed firebox/Direct-Vent technology – Air for combustion is drawn from outside the home, reducing cold air drafts; greater efficiency due to not using heated room air for combustion.

(1) The amount and weight of wood contained per cubic foot of firebox volume can vary from 15 to 36 lbs. per cubic foot depending on type of wood, moisture content, packing density, and other factors. As a constant for comparison and test purposes, we are assuming 20 lbs. of seasoned hardwood per cubic foot of firebox volume.

(2) See Owner’s Manual for specific alcove clearances and alcove hearthpad requirements.

(3) Heat output will vary depending on frequency of loading, the dryness and quality of wood used, packing density, and other installation variables.

(4) Efficiency measured using a lower heating value (LHV).

(5) Heating capacity is an approximation dependent upon type of wood, loading configuration, floor plan, house construction, venting configuration, heat loss, geographic location of home, and other usage and regional variables.

(6) HeatLife™ is a trademark of Hearthstone Quality Home Heating Products and is defined as the quantity of heat stored within the thermal mass of the stove. Used here, it refers not just to burn time but to total hours of usable heat from a single load of fuel.

(7) Clearances on this page are for reference only. Refer to the Owner’s Manual for exact specifications prior to installation.

(8) See Owner’s Manual for specific hearth material and R-value requirements.

**with 45-degree elbow if required*

***An example of a noncombustible floor protector would be a hearth constructed with a continuous layer of a listed backer board (such as Wonder-Board or Durock) used for ember protection with a tile, brick, slate, or other noncombustible facing.*
