

InLine Series Model #320W

* Heating Efficiency is lower compared to the Heco Elite Series because of the infrared reflective fire box glass and the additional insulation needed for zero clearance installation. This design retains more heat within the stove, leading to more consistent baking and cooking, while still achieving burn times of up to 12 hours.

** Side Cabinets (320320W-SC), Rear Wall Protection Kit (320320W-RWPK), Adapter Plate For Rear Exhaust (JSC6AP-320), Wall Thimble (SPR6WTB), and Double Wall Insulated Chimney Pipe are required for Zero Clearance Installation. Floor Protection Mat (320320W-FM) is required if stove is being installed on top of combustible floors.

*** Safety Tested to UL #1482, CAN / ULC #S627 & ASTM #E1509
All units require a Class "A" all fuel chimney. Installation must conform to

SPECIFICATIONS

Model Number	320W
Fuel	Wood Only
Heating Area (Recommended)	1,400 sq. ft.
BTU Rating	68,785
Heating Efficiency*	71%
Firebox (WxDxH)	19.5" x 15" x 12"
Fire Box Opening (WxH)	18" x 10"
Fire / Ash Door (WxH)	22.5" x 18.75"
