

MODEL 354/254

COAL BURNING STOVE

KEEPING YOU WARM
for more than 30 years

In Swiss, Hitzer means "heater". More importantly, Hitzer has come to mean quality, comfort, efficiency, value... and a commitment backed by superior Amish craftsmanship that provides you with years of heating performance.

The Swiss Amish craftsmanship of the Hitzer Model 354 and Model 254 coal heaters adds charm and beauty to any decor. The warm glow in the full-view window is a peaceful treat for the eyes and mind. Choose from an array of colors – black, brown, charcoal, green or blue – to compliment your color scheme. You can also add a gold or pewter plated door. Then sit back, relax and enjoy!

SAVINGS:

Coal is one of the cheapest, most abundant fuels on the planet. The Model 354 and Model 254 offers you significant savings year after year.

WARMTH:

The Model 354 and 254 are both designed to heat your entire home. With the optional circulation blower it helps distribute the heat to every corner of the house. Burning either anthracite or bituminous coal gives you a uniform and continuous heat which can be controlled by the thermostat.

EFFICIENCY:

With the unique baffling system the Model 354 and 254 reduces the amount of fuel consumed and offers great efficiency. The 254 is a smaller unit which can be used in homes of 1800 sq ft or less. The 354 can heat a home up to 2500 sq ft. The bi-metal thermostat, which requires no electricity, provides the uniform and constant heat for hours that customers have come to expect from all Hitzer units.

VERSATILITY:

These versatile units will fit any location and burn either anthracite or bituminous coal. The heavy cast iron shaker grates along with a removable ash pan, allows for easy ash removal. No electricity is required to burn the 254 and 354. What's more, it adds beauty to your home while keeping you comfortable on a cold winter day.
