Lugo in white tile

Lugo Cookstove

A contemporary fireplace and an efficient oven designed with the taste of good food in mind, Lugo - the wood-fired cookstove is perfect for both heating and baking. This fine product is designed by Vlastislav Vyborny from Romotop in the Czech Republic. The sleek design of the stove is synonymous with fine products. The Lugo utilizes advanced technology and brings that art of cooking on a wood fire into the 21st century.

The natural taste of food cooked on a fire is like no other. The big stainless steel oven compartment can reach temperatures of up to 500°F. The thermometer in the oven compartment makes cooking food to perfection so simple. The primary and secondary air are controlled by a single element with a special valve that allows steam to escape from the oven when necessary. The Lugo comes with a drip tray, a positioning grill, an oven thermometer, and the ability to top or rear vent. And as an added feature, there is a drawer for storage at the base of the stove.

Well-constructed with good cooking in mind, the body is made of high-grade steel in a dark gray finish. The cladding is available in a variety of tile colors (shown on the opposite page in white tile), natural stone, gray steel or sandstone (all shown at right).

Tested to Washington State fireplace environmental standards, and approved to UL 1482 standards in the United States and ULC S627 in Canada, the Lugo is highly efficient (80%) and clean-burning.

Technical Specifications		
Heat output range	14-38kBTU	4-11kW
Approx. heating area	1,600ft ²	150m ²
Flue size	6"	15cm
Weight	376-520lb	171-236kg
Dimensions: h/w/d	58/22/19"	147/56/47cm
Firebox: h/w/d	20/13/9"	50/34/22cm
