RANGE BOILER

HYDRASTONE LINED RANGE BOILER

Available From 30 - 120 Gallon Capacities

FEATURES

Hydrastone Lining

- Seamless Hydrastone cement lining provides long tank life
- Extremely tolerant to hard water supplies

Bronze Fittings

- All bronze fittings at all six tapings eliminates corrosion due to dissimilar metals. No dielectric unions or anode rod required
- No dielectric unions or anode rod required

Warranty

- Industry leading 5 year tank warranty

Vaughn Combines Efficiency and Longevity

The Vaughn Range Boiler combines Hydrastone Cement lining for the industry's most effective, longest lasting and reliable range boiler. For three generations Vaughn has built range boilers of heavy gauge steel with half inch thick Hydrastone lining and bronze fittings at all six water openings.

Vaughn Water Heaters... The Difference is the Lining

Bronze Tappings

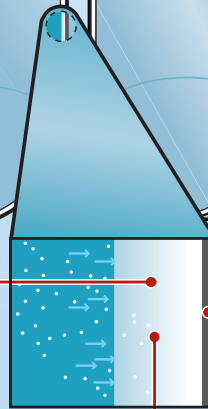

At all water openings eliminates corrosion due to dissimilar metals. No dielectric unions or sacrificial anode rod required.

Bronze Tappings

Hydrastone Lining

A seamless ½" thick cement lining is impervious to adverse water conditions and is proven to be the most effective method of preventing tank failure due to corrosion.

Protected Steel Tank Surface

Hydrastone Lining

(Actual Lining Thickness Shown)

Hydrastone lining absorbs and traps water, which then loses its oxygen and becomes inert, thus preventing tank corrosion.
