

Specifications

Model	Width		Height	Depth		Viewing Area
	Firebox	Base		Firebox	Base	
S20	26	22	34 1/4	24 1/2	20 1/2	153 in ²

Dimensions

Typical Chimney Installation

W415-2021 / C / 12.19.19

Minimum Clearance to Combustibles

WARNING

- Do not install into any area having less than 7 feet (2.1m) (ceiling to appliance bottom, excluding hearth height).

PARALLEL & CORNER	SINGLE WALL CONNECTOR	DOUBLE WALL CONNECTOR
Sidewall (A)	19" (48.3cm)	
Sidewall to flue (B)	28 7/8" (73.3cm)	
Backwall (C)	17 1/2" (44.5cm)	12 1/2" (31.8cm)
Backwall to flue (D)	21" (53.3cm)	16" (40.6cm)
Corner (E)	11" (27.9cm)	7" (17.8cm)
Ceiling (F)	84" (213.4cm)	75" (190.5cm)

Clearances can be reduced with shielding acceptable to local authorities. Reduced installation must comply with NFPA 211 or CAN/CSA-B365.

Alcove Installation

ALCOVE		
PARALLEL & CORNER	SINGLE WALL CONNECTOR	DOUBLE WALL CONNECTOR
Ceiling (G)	N/A	75" (190.5cm)
Sidewall (H)		19" (48.3cm)
Sidewall to flue (I)		28 7/8" (73.3cm)
Backwall (J)		12 1/2" (31.8cm)
Backwall to flue (K)		16" (40.6cm)

Floor Protection

MINIMUM FLOOR PROTECTION			
	FRONT (L)	SIDES (M)	BACK (N)
CANADA	18" (45.7cm)	8" (203mm)	
USA	16" (40.6cm)		

note:

If a section of horizontal chimney connector is used, floor protection is required under the chimney connector and 2" (51mm) beyond each side.

Appliance Placement

We recommend having your Napoleon wood burning appliance installed by a qualified technician. However, should you choose to install the appliance yourself, it is extremely important that you follow all installation instructions for the appliance, the chimney and connector if applicable, as well as local building codes. At the very least, draw a detailed plan of your installation, including clearance dimensions to combustibles, and have your authorized dealer review them to confirm that they conform to the relative installation parameters.

note:

When positioning the appliance, it may be necessary to adjust its position to prevent the chimney/vent system from intersecting with a framing member and to meet the minimum combustible clearance requirements. Its location should also avoid the potential for drapes or doors to swing within 48" (122cm) in front of the appliance to prevent a fire hazard.
