QUALITY PERFORMANCE RELIABILITY

At J. A. ROBY, we have been working in the heating industry for over 35 years, selling, among other things, stoves, fireplaces, furnaces, wood-burning cooking stoves, and fuel oil and ethanol fireplaces. Wishing to expand our range of heating products with gas appliances, we decided to analyze market trends and needs. We came to the conclusion that the "central" gas fireplace was the most sought after model in North America and it simply did not exist. So we created it!

J. A. ROBY GAS FIREPLACES

ONE FIREPLACE – SEVEN CONFIGURATIONS

All J. A. ROBY gas fireplaces come with four glass sides and the right number of thermal insulating panels and protective grilles required for the model ordered. To modify the configuration, simply remove thermal insulating panels and replace them with a protective grille or vice versa. In only 15 minutes, you have a brand new fireplace configuration: peninsula, panoramic, corner or even central!

- ✓ EACH UNIT IS FACTORY TESTED
- ✓ SEALED COMBUSTION CHAMBER
- ✓ PROTECTIVE GRILLE INCLUDED
- ✓ AUTOMATIC PRESSURE-RELEASE SYSTEM
- ✓ INSTALLATION APPROVED IN CANADA AND THE UNITED STATES
- ✓ TESTED BY INTERTEK AND IN COMPLIANCE WITH ANSI Z21.50-2012 AND CSA 2.22-2012 STANDARDS

The original burner configuration creates a variable-height flame that dances brightly for the entire length of the fireplace, giving you an unparalleled continuous flame.

IMPRESSIVE VIEW

The PAMPERO model is hands down the most popular model of our direct vent gas fireplace line. It offers an impressive view on all sides and is a great feature in a contemporary decor. With up to 32,000 BTU of heating power, the PAMPERO model comes with a clear ember bed on which you can add real-looking logs.

Model	PAMPERO (central)			
	NG	LPG	Min. BTU	Glass type
